7. PROCEDURES FOR OPTIMUM USE.

a. Understand the arrangement (set-up) of the index. If the publication does not appear in the current index, it is not a current publication. Check both current and obsolete sections for the publication in question. The obsolete sections contain only those publications which have become obsolete since the publication of the last DMA/Component indexes.

b. Record in the appropriate section of the consolidated index all changes, cancellations, and new issuances as they are received. Use the bimonthly "DMA Information Management Newsletter" to add publication changes. (Offices may keep a copy of the newsletter filed with the publications index.)
